Introduction

Egymec Engineering co is a member of Eldidi Group .Established in 2015 to work in the field of construction Machinery Equipment specially lifting sector .Egymec is the Exclusive agent in Egypt for many international Brands , Mainly for LINK BELT cranes from USA which serving many sectors like petroleum , military, contracting , steel and others .Also other brands from Italy such as CMC man-lift and PERIN generators.

Egymec Engineering serve all the sectors in Egypt

(public, governmental , Military , Petroleum , cement, steel and others for supply machines , spare parts and service .

Dr. Eng.A.F. Abd El Fattah Eldidi

Chairman of Board

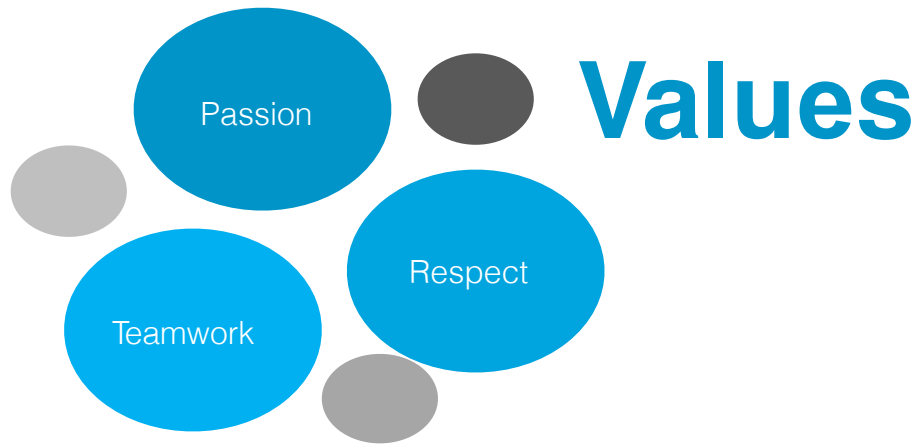

VISION

To pioneer in providing effective solutions and after sales services in the loading foundation and construction machinery sectors.

MISSION & VALUES

Through supplying high quality equipment, partnering with world leader companies and expanding worldwide, we ensure our clients' satisfaction.

Values

Winning through teamwork:

We encourage individual ownership, but work as a team.

We value the expertise, individuality and contribution of all colleagues, working in support of each other and readily sharing good practice, in pursuit of shared **goals**.

Safety :

Ensuring a safe and healthy environment for our employees, clients and the community.

Ownership:

We will make it happen and Count on us.

Passion:

We do it right, with quality & we are proud of it.

We are passionate about delivering superior service and take pride in achieving this.

We look to replicate success, learn from mistakes and develop the ideas, Innovation and practices that will help us improve and lead our market.

Respect:

We keep our promises

We treat each other like we want to be treated ourselves We respect the environment where we work.

Integrity:

If it is not right, we don't do it If it is not true, we don't say it.

What we offer.

Link-Belt CRANES

Link-Belt Cranes is a leader in the design, manufacture and sales of telescopic and lattice boom cranes, with headquarters in Lexington, Kentucky.

In the recent decade, a dynamic and highly-focused Link-Belt has emerged as a market leader in crane design and product quality standards by focusing on continuous improvement and employee empowerment.

Facilities

Link-Belt's core production base and center for worldwide operations is its 770,000 sq. ft. manufacturing facility in Lexington, Kentucky. With major expansion plans over the last ten years along with continuous improvement philosophies, this facility has emerged as the most modern crane facility in North America.

Link-Belt is committed to the design, manufacture and service of quality products that satisfy the needs of its customers worldwide. Link-Belt operates on the principles of continuous quality improvement, ISO 9001, and established values that support the vision of quality. These principles result in reduction in waste, better use of company resources and improved employee and customer satisfaction.

With a superior quality product and value, CMC quickly became a world leading aerial lift manufacturer of both truck mounted and self propelled units. Today CMC is a world leader in aerial lift technology and our lifts are a best seller in 30 countries worldwide, integrating ingenious new ideas and always building lifts “with the operator in mind” translated into a simpler to operate and less extensive aerial lift. This winning combination gave our customers a better value and greater ROI.

S15: The most compact spider lift available on the market. Quick to operate and easy to set-up

S19HD: A heavy duty crawler lift

CMC S19 N: “N” is the most compact crawler access platform available in this size range with the shortest stabilizing width area, less than 10.2 m²

CMC S19E “E” stands for Easy: Easy operations, easy maintenance, perfect for hire! Only one working area with 200Kg unrestricted

S25: Big on height and outreach, small in dimensions and gross weight

S32: Unique 32 meters crawler lift available in the worldwide market with articulated double-telescopic boom with jib!

S41: Our largest and highest reach self propelled aerial aerial work platform with 16 meters lateral outreach

Lift, move, rotate: as easy as saying it, Since 1973 the Faresin Group has been manufacturing high quality mechanical products. The design and the construction of the entire range of FH series telescopic handlers are based on the Group's wealth of experience and on a very well-defined guiding philosophy: to offer clients the most productive breakthrough technology in order to increase their competitive potential. It is precisely this ongoing dedication and effort that the Faresin Handlers' technicians and team put into achieving these goals that is transformed into technical progress, continuous improvement of our products and concrete advantages for our customers.

Products

FH presents a comprehensive range of machines and is one of the few manufacturers worldwide that can offer a rotating platform. Our ranges of machines, from the compact Wallaby 6.25 to the powerful 10.70, and including the rotating 18.45 Storm, have been designed with the user's needs in mind. FH machines are available in a variety of configurations with a selection of different features.

AGRI: base machine plus double-acting hydraulic connections installed at the back and 7-pole electric sockets for trailer lights.

HS: base machine in both industrial and Agri models, in addition 2-speed mechanical gearbox and roadworthy approval to 40 km/h.

TR: base machine plus special OCDE approved cab (width increased by 50 mm, three emergency openings, structure designed for greater visibility), 2-speed mechanical gearbox and approved to travel at 40 km/h and to tow 20 t, double-acting hydraulic connections installed at the back and 7-pole electric sockets for trailer lights.

LOCATELLI CRANE S.r.l. is the first Italian Company manufacturer of telescopic hydraulic cranes and specialized in the production of Rough Terrain Cranes, ranging from 12,5 through 80 metric ton capacity as well as city cranes 20 ton capacity, with a great choice of options for different applications.

The success of Locatelli cranes is based in their reliability, high performance level and low maintenance costs as a result of high quality components, no compromise in construction and long experience of specialized manufacturing.

- **Technical assistance**
Assistance and efficiency for our customer's cranes is always ensured.
- **International partner**
Where there's need, throughout the world, to move heavy loads Locatelli Crane becomes your ideal mate.
- **Training courses**
Locatelli Crane arranges classes with the aim to train operators in the use of various model of cranes.
- **Spare parts**
Well equipped warehouse is able to respond to request for crane parts provisioning.
- **Safety**
Hydraulic mobile cranes Locatelli Crane were built to guarantee high safety standards.
- **Business consulting**
Highly motivated sales representatives are available to advice you about the best cranes according to your needs.

PERIN™

Our company was founded by Mr. Perin Diotalvi: our small craft produced generating sets, motor welders and motor pumps. In the space of few years, the company developed and specialized in planning and building generating sets of ever-bigger powers. With the passing of time, the small craft became an important and well-known industrial reality with thousands of installations all over the world.

At present, the company has got an annual production of about 3000 generating sets whose range covers small and big powers, from 2 up to 12.000 KW. Our production is placed in three factories of our property in Europe, which are divided up by the type of their products and controlled directly by the Italian factory where special generating sets are built according to customer's order. In Italy there's besides our engineering staff, the supply and transport department for customer service all over the world and the sales department, which is further divided into six big geographic areas.

All the components which are needed to build our products are studied, planned and tested internally. 80% of the necessary components, apart from the engine and the alternator, is internally produced in specific departments, whereas the remaining part is ordered to trustworthy companies our staff selected.

The direct relationship with engine and alternator producers allows a close technical/business cooperation which enables us to have specifically designed products for the uses we require. The experience and the professional competence of our staff has made it possible to supply generating sets which have no rivals in the world for their quality, performances and competitiveness. The technical evolution of every single component is now designed and projected together with the most prestigious engine and alternator producers, by strengthening the prestige of our company all over the world.

We have been concluding special supply and transport agreements with the engine and alternator producers in the three countries where we have productive branches, that is to say that our warehouses are also used for stocking components for other producers in this field. The high volume of material we manage allows us to offer a bigger availability of components and, in this way, we can satisfy the highest number of requests with quick delivery times which would be otherwise impossible. At present, we can supply generating sets from 2 up to 1800 KVA in 8 working days at the latest, excluding exceptional cases, obviously.

MAINTENANCE

A wide range of services designed to satisfy every need. An efficient after sales service network assures full technical assistance worldwide, provided by El DIDI Group specialized teams.

Over the course of operating experience, El Didi Group has created a recognizable brand that customers can rely on, knowing that they can count on a safe, dependable product that has been thoroughly tested on-site, our customers benefit from a full assistance service, starting from the first contact with our technology then purchasing the equipment up to the on-site operation.

Our after-sales service is unrivaled, with customer services available 24-5, spare parts delivered in record time, problems solved in any situation, even in the most complicated circumstances.

Because a satisfied customer is our greatest reward.
